WORK EXPERIENCE

Beryllium, Guardsman Group

Solutions Engineer

JAN 2025 - Present

- Managing the full software lifecycle of a custom application for Norman Manley International Airport (NMIA), incorporating intelligent data processing to ensure high-speed deployment and accuracy.
- Engineered group-wide Power Platform solutions, including an ICT asset management platform and a Compliance Hub that leverages automated logic to streamline group-level reporting.
- Spearheading the integration of AI tools within group operations to automate regulatory workflows.
- Reduced manual data handling by 30% by developing C# service workers for automated file processing and AI-assisted data cleansing protocols in MS SQL Server.

Innovate 10X, JMMB

Software Engineer

JAN 2024 - DEC 2024

- Developed secure C# and ASP.NET FinTech applications, implementing automated logic for complex financial transactions and legacy refactoring.
- Designed RESTful APIs and optimized MS SQL schemas that increased inventory processing efficiency by 20%.
- Fortified banking infrastructure against cyber risks by implementing OWASP standards, ensuring secure pathways for API integrations.

Microsoft Leap , MC Systems

Software Developer Apprentice

JUL 2023 - JAN 2024

- Delivered full-stack .NET and React solutions with a focus on Azure-based deployment and data integrity.
- Optimized deployment pipelines using Azure DevOps for rapid iterations of emerging tech features.

Digicel Group

Junior Software Developer / IT Helpdesk

JAN 2022 - JAN 2024

- Developed telecom applications utilizing IoT and AI-driven signal processing to enhance network scalability.
- Managed Azure AD and Office 365 environments, providing support for enterprise-wide cloud tool adoption.

Projects

- [Linkio Technologies](#) | **Founder & Lead Developer**: Deployed a responsive React/Next.js page builder. Currently architecting a roadmap for AI-driven layout generation.
- **Fundrise**: Engineered a React Native finance application currently in development, featuring automated transaction categorization and intelligent budget insights.

EDUCATION

University of The West Indies | Kingston, Jamaica

Bsc. Computer Science | GP A: 3.2 | February 2023

Certifications

CompTIA Security+

SKILLS

AI & Automation: Prompt Engineering, LLM Integration (OpenAI/Gemini), Microsoft Copilot, Power Automate.

Backend & Security: API Security, C#, .NET Core, ASP.NET MVC, Web API, Python, Node.js,

Database & Cloud: MS SQL Server, T-SQL, PostgreSQL, MySQL, Git, Azure DevOps, Azure AD, CI/CD.

Frontend: JavaScript, React, Next.js, Tailwind CSS
